

Spring HVAC Checklist

One Stop HVAC | Calgary 2026

Use this checklist each spring to keep your HVAC system running efficiently and catch small problems before they become expensive repairs.

- 1 Replace furnace filter (correct MERV rating)
- 2 Turn off furnace humidifier and close bypass damper
- 3 Clean around outdoor AC unit (60 cm clearance)
- 4 Check AC refrigerant lines for damage
- 5 Test AC in cooling mode for 15 minutes
- 6 Inspect visible ductwork for leaks or damage
- 7 Clean supply and return vents in every room
- 8 Program thermostat for summer schedule
- 9 Test carbon monoxide detectors and batteries
- 10 Check and flush condensate drain line
- 11 Schedule professional tune-up (before June rush)
- 12 Note furnace model and serial numbers
